AFMETCAL Lease Extended to 2015

The Port Authority announced the recent signing of a lease extension by Bionetics' for lease of the office building for the AFMETCAL program. The extension carries the lease for the 29,000 s.f. building through September 2015. This is the third major new lease signed by the Port Authority in the past 12 months involving over 820,000 s.f. of space at the Aerospace Center.

Horton Building Starts June 24

Thursday expects to see the mobilization of Robertson Construction for construction of the new 43,461 s.f. Horton Building. The building, recently named for Wally Horton, is expected to be ready for occupancy in the second quarter of 2011. Follow progress on a dedicated Facebook page maintained by the Port Authority's project managers.

Construction Directions

A note for Aerospace personnel and visitors. Construction of the Horton Building will displace those who park in the southern-most end of the West Parking Lot. In addition, traffic patterns for visitors and the handicapped lot near the COATC water tower will also change. For this visitor parking, visitors are suggested to use route "A" on the Aerospace Center directions and map.

Summer Projects

The first wave of projects is wrapping up just as soon as another wave begins. The demolition of the former east bridge is about to close out. Meanwhile, projects for extension of a water line along Kaiser Drive and extension of electric service to the new Horton Building are currently out for bids. Look for pavement and fencing projects in a third wave later this Summer.
