Horton Building Progress Report

The footers are now fully in place for the Horton Building project with masonry work the next, most visible aspect of the project beginning soon. The Port Authority project managers are maintaining a Facebook page to track the progress and to report on the economic impact of the project. Look for frequent profiles of the people and companies from Licking County who are lending their talent and expertise to making this project happen.

Other Projects

With over \$5 million in capital projects on its plate for 2010, the Horton Building is not the only capital project underway. The Port Authority is now underway with extension of a city water line along Kaiser Drive on the Aerospace Center South Campus. Other Base Campus projects are also about to get underway, including extension of electric service for the Horton Building and future building locations on the west side.

A Year on Facebook

We only have .00005% of the 500 million Facebook users as fans of our Port Authority Facebook page, but what we lack in quantity we make up for in quality. It was July 20, 2009 when the Port Authority Facebook page debuted. Since then, we posted hundreds of updates and photos that are unavailable anywhere else.
