Thinking of Capital Investments

The Port Authority has undertaken over \$10 million in capital improvement projects in the past two years. This year has seen a host of low visibility projects ranging from a fire pump that reduces the waste of treated water during required testing by a million gallons a year to the demolition of the 1958-era water tower.

Thinking About Electric Service

The dual feed 69KV transmission line that serves 98% of the base campus of the Aerospace Center never lost power during the recent derecho storm that impacted Ohio and the Midwest. Though one day of production was lost by a base campus employer not served by the 69KV, the long-standing record of reliability was a highlight during an otherwise challenging time in the region.

Thinking 50th Anniversary

Bookmark the Port Authority's Facebook page for your 50th Anniversary fix. Every Friday, Bill Wright digs into the Port Authority archives including a full collection of the old base newspaper, On Target, to spotlight one of the stories of the past 50 years of metrology and inertial guidance system repair in Heath.
