\$322 Million, And Climbing

The Port Authority's *Potentia Financing* program has completed \$322 million in financings over the years. And it's climbing.

Two more projects are in the pipeline that bring the total up another \$20 million before the end of 2015.

The 60,000 sq. ft. building under construction for MISTRAS Group (pictured) is the latest construction project financed by this unique port authority capability.

If There's a Shutdown. . .

"So, what am I supposed to do with Poland's metrology equipment?," Port Authority CEO Rick Platt recalled asking in 2013, the last time we had a federal government shutdown. The looming October 1 deadline for a continuing resolution from Congress to sustain funding will certainly have unpredictable impacts on the Base Campus of the Aerospace Center should it result in a federal government shutdown. The Port Authority will be monitoring and sharing the facts about the impacts with our Congressional delegation.

2015 Projects Update

2015 continues to stand out as a milestone year in the history of the Aerospace Center.

While the 60,000 sq. ft. MISTRAS Group building, 50,000 sq. ft. Southgate Spec Building, and 20,000 sq. ft. Port Authority industrial spec building

projects near wrap-up, others are nearing ribbon cuttings. The state-of-the-art Bionetics Flow Lab is up and running now. Ariel Corporation's new space is occupied. The Aerospace Drive bridge is open to traffic.
