Now Available: 20,000 s.f. Building

The Port Authority is wrapping up construction on a 20,000 s.f. industrial building being built on speculation. The building is now available.

With modern ceiling heights of 24' clear, a loading dock, a drive-in door, and efficient systems installed, the stand-alone building sits on 3.4 acres and stands out as the only one of its kind available in the Central Ohio market. Coupled with the highly-craved Licking County workforce, the building is already seeing interest.

2015 Projects Update

2015 will surely stand out as a milestone year in the history of the Aerospace Center.

Look for a photo-op turning over the keys on the MISTRAS Group new labs and offices next week. A ribbon cutting on International Drive, a project which opened up

22 more acres for developer-built spec buildings, is not far off either. The Southgate 50,000 s.f. spec building is also available.
