## Time Lapses 18 Months in 69 Seconds

From the wrap-up of the new building for xperion to the wrap-up of the new 60,000 sq. ft. building for MISTRAS Group, the Port Authority's Facebook page has a timelapse video that condenses 18 months to just 69 seconds.

Watch four buildings progress during a highly-productive development time frame in the history of the Aerospace Center.

## All Covered From Sites to Buildings

Manufacturers are finding the Port Authority has property available in a wide range of size ranges. A Southgate-built 50,000 s.f. building, expandable to 100,000 s.f., is available along with a 20,000 s.f. Port Authority building expandable to 40,000 s.f. Coupled with sites at 7-, 20-, 35-, and 50-acres in size makes for a wide range of greenfield site options for prospects too.

## Seeing Weather More Ways Than One

For more than a dozen years now, the Port Authority has operated an on-site weather station with more ways of seeing the weather than just one. The weather station has a remote pavement sensor that reports the temperature of a section of asphalt. It's useful to know what those temperatures are to know when conditions support thaw or not. Today's pavement hit 15 degrees F. That's pretty cold.
