Dual Groundbreaking with Governor

Ohio Governor Mike DeWine brought his economic development spotlight to the Port Authority campus. A unique "dual groundbreaking" was the occasion, breaking ground for two new spec buildings in Central Licking County. The Governor spotlighted local economic development and the value of supporting manufacturing.

Southgate Corporation unveiled plans for a 70,000 sq. ft. new multi-tenant industrial building. The Port Authority showed plans, now [out to bids](#), for a 20,000 sq. ft. industrial building. Both are being built on speculation with manufacturing customers as the target industry.

These buildings represent the 8th and 9th spec buildings built on the Aerospace Center campus since 2011.

A Record Year! 4th and 5th Buildings

The keys are about to be turned over for the first new building in 2019—a new, modernized Force Lab. The two-story lab will be ready to accept equipment from the Air Force soon.

SeaCo and Nature's One are well underway on their buildings. The Southgate and Port Authority spec buildings represent the fourth and fifth new buildings on the campus this year. That's a record!

In addition, GB Food and Licking County 911 Center buildings are wrapping up interior build-out to also be ready. A sixth building is in the works. Stay tuned!
